Self-emulsifying drug delivery systems changing their zeta potential via a flip-flop mechanism

Esmail Salimi, Bao Le-Vinh, Forouhe Zahir-Jouzdani, Barbara Matuszczak, Azadeh Ghaee, Andreas Bernkop-Schnürch

PII: S0378-5173(18)30624-0
DOI: <https://doi.org/10.1016/j.ijpharm.2018.08.046>
Reference: IJP 17732

To appear in: *International Journal of Pharmaceutics*

Received Date: 14 July 2018
Revised Date: 21 August 2018
Accepted Date: 23 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
