Title: CHRONIC CORTICOSTERONE INCREASES Δ FOSB AND CRFR1 IMMUNOREACTIVITY IN BRAIN REGIONS THAT MODULATE AVERSIVE CONDITIONING

Authors: Rafael Yutaka Scalize Hirata, Thays Brenner dos Santos, José Simões de Andrade, Luciana Le Sueur Maluf, Hanna K.M. Antunes, Luís Roberto G. Britto, Isabel Cristina Céspedes, Milena de Barros Viana

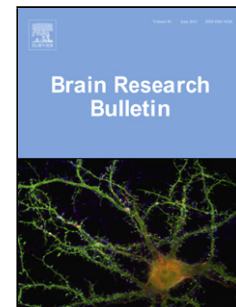

PII: S0166-4328(18)30558-8
DOI: <https://doi.org/10.1016/j.bbr.2018.08.011>
Reference: BBR 11535

To appear in: *Behavioural Brain Research*

Received date: 18-4-2018
Revised date: 17-7-2018
Accepted date: 13-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HIGHLIGHTS

- Chronic corticosterone does not alter light/dark transition measurements.
- Chronic corticosterone increases Δ FOSB immunoreactivity.
- Chronic corticosterone increases CRFR1 mRNA.
