Effect of red light and near infrared laser on the generation of reactive oxygen species in primary dermal fibroblasts

Sajan George, Michael R. Hamblin, Heidi Abrahamse

PII: S1011-1344(18)30650-X
DOI: doi:[10.1016/j.jphotobiol.2018.09.004](https://doi.org/10.1016/j.jphotobiol.2018.09.004)
Reference: JPB 11345

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 20 June 2018
Revised date: 31 July 2018
Accepted date: 5 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of red light and near infrared laser on the generation of
reactive oxygen species in primary dermal fibroblasts**
