

## Accepted Manuscript

Title: Techno-economic analysis of geopolymer production from the coal fly ash with high iron oxide and calcium oxide contents

Authors: Siming You, Siew Wah Ho, Tingting Li, Thawatchai Maneerung, Chi-Hwa Wang

PII: S0304-3894(18)30776-3  
DOI: <https://doi.org/10.1016/j.jhazmat.2018.08.089>  
Reference: HAZMAT 19714

To appear in: *Journal of Hazardous Materials*

Received date: 8-3-2018  
Revised date: 24-8-2018  
Accepted date: 28-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Techno-economic analysis of geopolymer production from the coal fly ash with high iron oxide and calcium oxide contents

## Highlights

- The low acid resistance of geopolymer was related to the high iron oxide content.
- The heat resistance of geopolymer was better than that of OPC.
- Geopolymer production (material use) design improves the economics of the process.
