Novel method for improving fatigue behavior of carbon fiber reinforced epoxy composite

Ajitanshu Vedrtnam

PII: S1359-8368(18)32156-5

DOI: [10.1016/j.compositesb.2018.08.062](https://doi.org/10.1016/j.compositesb.2018.08.062)

Reference: JCOMB 5892

To appear in: *Composites Part B*

Received Date: 10 July 2018

Revised Date: 31 July 2018

Accepted Date: 20 August 2018

Please cite this article as: Vedrtnam A, Novel method for improving fatigue behavior of carbon fiber reinforced epoxy composite, *Composites Part B* (2018), doi: 10.1016/j.compositesb.2018.08.062.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Novel method for improving fatigue behavior of carbon fiber reinforced epoxy composite
