

## Accepted Manuscript

Banana starch and molecular shear fragmentation dramatically increase structurally driven slowly digestible starch in fully gelatinized bread crumb

Laura Román, Manuel Gómez, Bruce R. Hamaker, Mario M. Martinez

PII: S0308-8146(18)31592-9  
DOI: <https://doi.org/10.1016/j.foodchem.2018.09.023>  
Reference: FOCH 23510

To appear in: *Food Chemistry*

Received Date: 25 April 2018  
Revised Date: 26 August 2018  
Accepted Date: 3 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Banana starch and molecular shear fragmentation dramatically increase  
structurally driven slowly digestible starch in fully gelatinized bread crumb**
