Fracture mechanisms induced by microporosity and precipitates in isothermal fatigue of polycrystalline nickel based superalloy

Yahui Liu, Yun Wu, Maodong Kang, Mengmeng Wang, Min Li, Haiyan Gao, Jun Wang, Baode Sun, Ying Ning

PII: S0921-5093(18)30898-0
DOI: <https://doi.org/10.1016/j.msea.2018.06.095>
Reference: MSA36650

To appear in: *Materials Science & Engineering A*

Received date: 16 April 2018
Revised date: 21 June 2018
Accepted date: 23 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fracture mechanisms induced by microporosity and precipitates in isothermal fatigue of polycrystalline nickel based superalloy
