

Accepted Manuscript

The effects of illness severity, cognition, and estimated antipsychotic dopamine receptor occupancy on insight into the illness in schizophrenia: An analysis of clinical antipsychotics trials of intervention effectiveness (CATIE) data

Miracle Ozzoude, Shinichiro Nakajima, Eric Plitman, Jun Ku Chung, Julia Kim, Yusuke Iwata, Fernando Caravaggio, Hiroyoshi Takeuchi, Hiroyuki Uchida, Ariel Graff-Guerrero, Philip Gerretsen

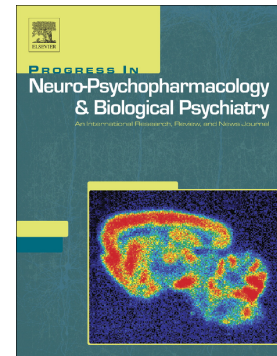

PII: S0278-5846(18)30318-X
DOI: doi:[10.1016/j.pnpbp.2018.08.033](https://doi.org/10.1016/j.pnpbp.2018.08.033)
Reference: PNP 9493

To appear in: *Progress in Neuropsychopharmacology & Biological Psychiatry*

Received date: 28 April 2018
Revised date: 19 August 2018
Accepted date: 29 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Word count (main body): 4021

Word count (abstract): 222

Number of references: 63

Number of Tables: 1

Number of Main Figures: 2

Number of Supplementary Materials: 5

The Effects of Illness Severity, Cognition, and Estimated Antipsychotic Dopamine Receptor

Occupancy on Insight into the Illness in Schizophrenia: An Analysis of Clinical

Antipsychotics Trials of Intervention Effectiveness (CATIE) Data

Running title: Impaired insight, Illness severity, Cognition, and Dopamine D₂ receptor

occupancy
