Predictive models for thermal inactivation of human norovirus and surrogates in strawberry puree

Christina Bartsch, Carolina Plaza-Rodriguez, Eva Trojnar, Matthias Filter, Reimar Johne

PII: S0956-7135(18)30440-7

DOI: [10.1016/j.foodcont.2018.08.031](https://doi.org/10.1016/j.foodcont.2018.08.031)

Reference: JFCO 6295

To appear in: *Food Control*

Received Date: 3 July 2018

Revised Date: 27 August 2018

Accepted Date: 28 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Predictive models for thermal inactivation of human norovirus and surrogates**
2 **in strawberry puree**
