This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An engine speed control model is established and identified by step experiments.
- A gas engine speed control strategy is proposed and applied to control the engine speed of GEHPs.
- The engine speed controller has a good performance in terms of settling time and overshoot.
