

## Accepted Manuscript

### Criteria-based Ranking of Green Building Design Factors According to Leading Rating Systems

Dr Aladdin Alwisy

PII: S0378-7788(18)31814-0  
DOI: <https://doi.org/10.1016/j.enbuild.2018.08.043>  
Reference: ENB 8779

To appear in: *Energy & Buildings*

Received date: 13 June 2018  
Revised date: 15 August 2018  
Accepted date: 26 August 2018

Please cite this article as: Dr Aladdin Alwisy, Criteria-based Ranking of Green Building Design Factors According to Leading Rating Systems, *Energy & Buildings* (2018), doi: <https://doi.org/10.1016/j.enbuild.2018.08.043>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A methodology is presented for ranking green building design factors.
- Criteria and sub-criteria are identified through a review of leading rating systems.
- A pair-wise evaluation process is performed to define distinct research areas.
- Building envelope has the greatest influence on the environmental impact of buildings.
