This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Historical failure knowledge seems to have strong predictive power in CI environments
- History-based TCP does not necessarily require a large amount of historical data
- Diversity-based TCP can be used effectively when no historical data is available
- Diversity-based TCP can be combined with History-based TCP to improve its effectiveness
- History-based diversity using NCD Multiset achieved highest APFD but lowest performance
