Title: A dual-functional probe for quantification and imaging of intracellular telomerase

Authors: Xiaoting Li, Beibei Chen, Man He, Bin Hu

PII: S0925-4005(18)31619-8
DOI: <https://doi.org/10.1016/j.snb.2018.09.014>
Reference: SNB 25320

To appear in: *Sensors and Actuators B*

Received date: 16-5-2018
Revised date: 29-8-2018
Accepted date: 4-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

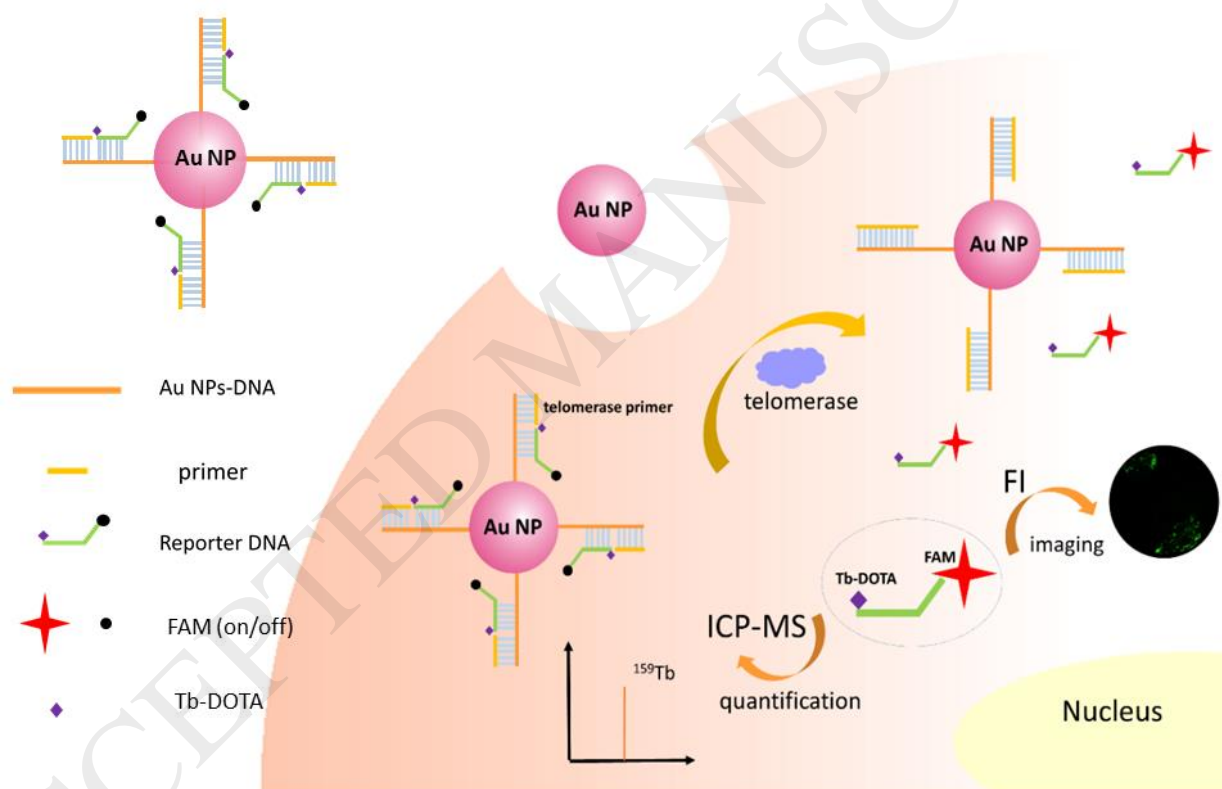

A dual-functional probe for quantification and imaging of intracellular telomerase

Xiaoting Li, Beibei Chen, Man He, Bin Hu*

Key Laboratory of Analytical Chemistry for Biology and Medicine (Ministry of Education),

Department of Chemistry, Wuhan University, Wuhan 430072, China

Graphical Abstract

Highlights

- Dual-functional probe for quantification and imaging of intracellular telomerase was designed.
- ICP-MS quantification and fluorescence imaging of intracellular telomerase were realized.
