

## Author's Accepted Manuscript

Transglutaminase induced gels using bitter apricot kernel protein: Chemical, textural and release properties

Xiaoyu Wen, Feng Jin, Joe M. Regenstein, Fengjun Wang

PII: S2212-4292(18)30340-7  
DOI: <https://doi.org/10.1016/j.fbio.2018.09.002>  
Reference: FBIO331

To appear in: *Food Bioscience*

Received date: 8 April 2018  
Revised date: 17 July 2018  
Accepted date: 7 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
