This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- This is the first application of Pareto-optimization on real data in AHP.
- Methodological background of Pareto test is introduced.
- Full description of the application procedure is provided.
- Conclusions are summarized and suggestions are made to other potential appliers.
- Results are directly disposable for public transport development decisions.
