Title: Facile synthesis of single-nickel-atomic dispersed N-doped carbon framework for efficient Electrochemical CO₂ reduction

Authors: Peilong Lu, Yijun Yang, Jiannian Yao, Meng Wang, Sobia Dipazir, Menglei Yuan, Jingxian Zhang, Xi Wang, Zhujun Xie, Guangjin Zhang

PII: S0926-3373(18)30854-3
DOI: <https://doi.org/10.1016/j.apcatb.2018.09.025>
Reference: APCATB 17008

To appear in: *Applied Catalysis B: Environmental*

Received date: 14-6-2018
Revised date: 1-9-2018
Accepted date: 8-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Facile synthesis of single-nickel-atomic dispersed N-doped carbon framework for efficient Electrochemical CO₂ reduction
