Facile synthesis of carbon-LiMnPO<sub>4</sub> nanorods with hierarchical architecture as a cathode for high-performance Li-ion batteries

Junzhe Li, Shao-hua Luo, Qing Wang, Shengxue Yan, Jian Feng, Huan Liu, Xueyong Ding, Ping He

PII: S0013-4686(18)32081-4

DOI: [10.1016/j.electacta.2018.09.095](https://doi.org/10.1016/j.electacta.2018.09.095)

Reference: EA 32627

To appear in: *Electrochimica Acta*

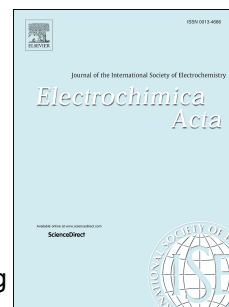

Received Date: 7 July 2018

Revised Date: 11 September 2018

Accepted Date: 14 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
