Voltammetric behaviour of the anticancer drug irinotecan and its metabolites in acetonitrile. Implications for electrochemical therapeutic drug monitoring

Gregorio Bonazza, Stefano Tartaggia, Giuseppe Toffoli, Federico Polo, Salvatore Daniele

PII: S0013-4686(18)32080-2

DOI: [10.1016/j.electacta.2018.09.094](https://doi.org/10.1016/j.electacta.2018.09.094)

Reference: EA 32626

To appear in: *Electrochimica Acta*

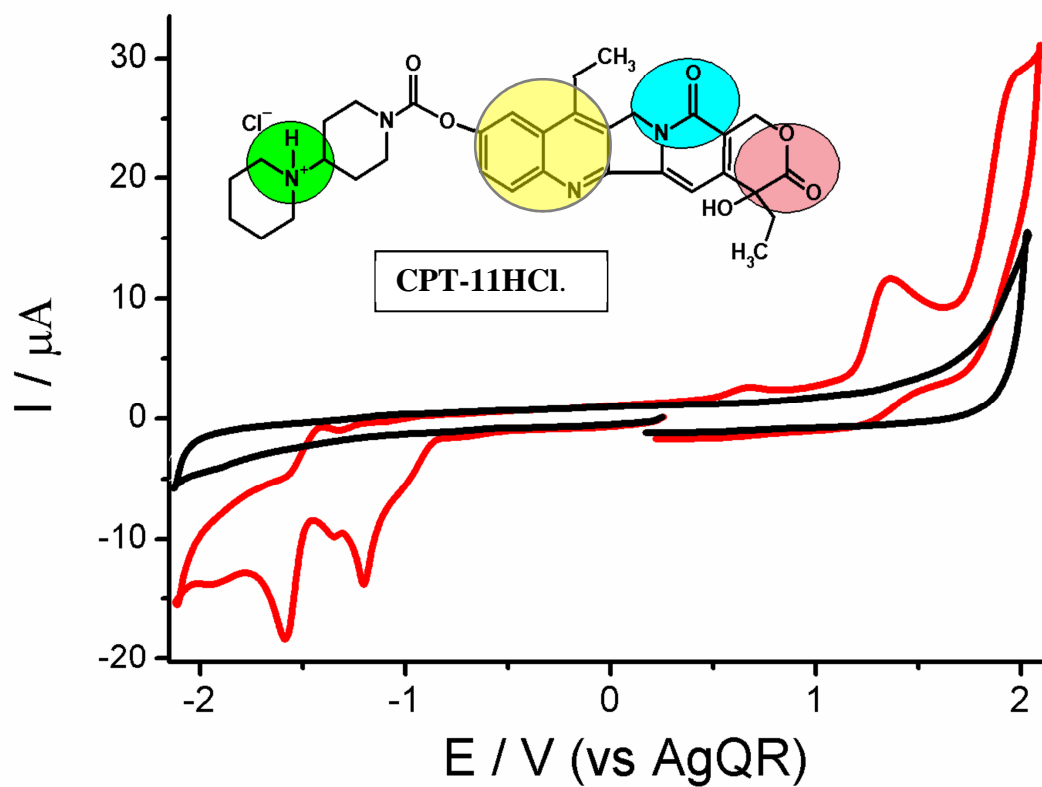

Received Date: 12 June 2018

Revised Date: 29 August 2018

Accepted Date: 14 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract: Voltammogram recorded at a GCE in acetonitrile solution containing CPT-11HCl.
