Determination of water solubility in supercritical CO<sub>2</sub> from 313.15 to 473.15 K and from 10 to 50 MPa by in-situ quantitative Raman spectroscopy

Zhe Wang, Qian Zhou, Huirong Guo, Panrui Yang, Wanjun Lu

PII: S0378-3812(18)30318-2

DOI: [10.1016/j.fluid.2018.08.006](https://doi.org/10.1016/j.fluid.2018.08.006)

Reference: FLUID 11920

To appear in: *Fluid Phase Equilibria*

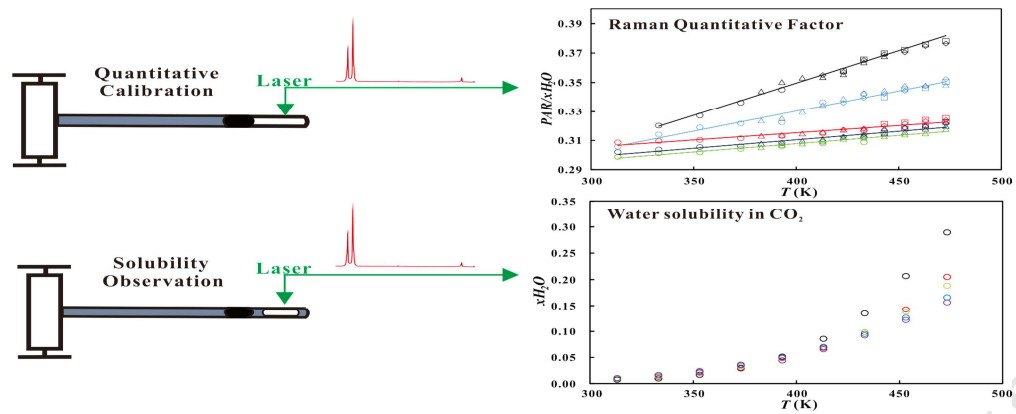

Received Date: 8 April 2018

Revised Date: 2 August 2018

Accepted Date: 9 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
