FORA: An OWO based framework for finding Outliers in Web Usage Mining

Ankit Gupta, Shruti Kohli

PII: S1566-2535(17)30497-9
DOI: <https://doi.org/10.1016/j.inffus.2018.08.003>
Reference: INFFUS 1006

To appear in: *Information Fusion*

Received date: 16 August 2017
Revised date: 20 June 2018
Accepted date: 2 August 2018

Please cite this article as: Ankit Gupta, Shruti Kohli, FORA: An OWO based framework for finding Outliers in Web Usage Mining, *Information Fusion* (2018), doi: <https://doi.org/10.1016/j.inffus.2018.08.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Web based mining techniques may require interdisciplinary approach like aggregation.
- Use of OWA operators provides flexibility to define outliers as per requirement.
- An error rectification value is proposed to define outliers.
- Approach is useful in uncertain environments like share market.
