This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights:

- Two extended Phase-type models based on Markov repairable systems are proposed.
- The distribution functions for two extended Phase-type distributions are presented.
- Some reliability indexes under two models, such as the point-wise availabilities, various interval availabilities, are given.
