Moment-based evaluation of structural reliability

Cao Wang, Hao Zhang, Quanwang Li

PII: S0951-8320(17)30505-7
DOI: <https://doi.org/10.1016/j.ress.2018.09.006>
Reference: RESS 6257

To appear in: *Reliability Engineering and System Safety*

Received date: 27 April 2017
Revised date: 27 August 2018
Accepted date: 6 September 2018

Please cite this article as: Cao Wang, Hao Zhang, Quanwang Li, Moment-based evaluation of structural reliability, *Reliability Engineering and System Safety* (2018), doi: <https://doi.org/10.1016/j.ress.2018.09.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A moment-based reliability analysis method is proposed.
- It provides a novel perspective for evaluating structural reliability.
- The method is efficient in solving multi-dimensional reliability problems.
