

Accepted Manuscript

Metal ion release barrier function and biotribological evaluation of a zirconium nitride multilayer coated knee implant under highly demanding activities wear simulation

Ana Laura Puente Reyna, Bernhard Fritz, Jens Schwiesau, Christoph Schilling, Burkhard Summer, Peter Thomas, Thomas M. Grupp

PII: S0021-9290(18)30657-2

DOI: <https://doi.org/10.1016/j.jbiomech.2018.07.043>

Reference: BM 8806

To appear in: *Journal of Biomechanics*

Received Date: 16 March 2018

Revised Date: 20 July 2018

Accepted Date: 31 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original Article

Metal ion release barrier function and biotribological evaluation of a zirconium nitride multilayer coated knee implant under highly demanding activities wear simulation

(Word count: 4094)

Ana Laura Puente Reyna^{1,2}, Bernhard Fritz¹, Jens Schwiesau^{1,2}, Christoph Schilling¹, Burkhard Summer³, Peter Thomas³, Thomas M. Grupp^{1,2}
