Prediction of stenting related adverse events through patient-specific finite element modelling

Alessandro Caimi, Francesco Sturla, Francesca Romana Pluchinotta, Luca Giugno, Francesco Secchi, Emiliano Votta, Mario Carminati, Alberto Redaelli

PII: S0021-9290(18)30669-9

DOI: <https://doi.org/10.1016/j.jbiomech.2018.08.006>

Reference: BM 8817

To appear in: *Journal of Biomechanics*

Received Date: 12 February 2018

Revised Date: 3 August 2018

Accepted Date: 10 August 2018

Please cite this article as: A. Caimi, F. Sturla, F. Romana Pluchinotta, L. Giugno, F. Secchi, E. Votta, M. Carminati, A. Redaelli, Prediction of stenting related adverse events through patient-specific finite element modelling, *Journal of Biomechanics* (2018), doi: <https://doi.org/10.1016/j.jbiomech.2018.08.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BM-D-18-00154 (Rev.2)

Prediction of stenting related adverse events through patient-specific finite element modelling

Alessandro Caimi ^a, MSc, Francesco Sturla ^b, PhD, Francesca Romana Pluchinotta ^c, MD, Luca Giugno ^c, MD, Francesco Secchi ^d, MD, Emiliano Votta ^a, PhD, Mario Carminati ^c, MD, Alberto Redaelli ^a, PhD
