

## Accepted Manuscript

Hemicyanine-linked pyrimidine mimics as solvatochromic fluorophores with visible excitation wavelengths

Prashant S. Deore, Christopher J. Osuch, Richard A. Manderville

PII: S0040-4039(18)31076-1  
DOI: <https://doi.org/10.1016/j.tetlet.2018.09.004>  
Reference: TETL 50243

To appear in: *Tetrahedron Letters*

Received Date: 1 August 2018  
Revised Date: 27 August 2018  
Accepted Date: 1 September 2018

Please cite this article as: Deore, P.S., Osuch, C.J., Manderville, R.A., Hemicyanine-linked pyrimidine mimics as solvatochromic fluorophores with visible excitation wavelengths, *Tetrahedron Letters* (2018), doi: <https://doi.org/10.1016/j.tetlet.2018.09.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphical Abstract

**Hemicyanine-linked pyrimidine mimics as solvatochromic fluorophores with visible excitation wavelengths**
