Sustainable Geopolymer Concrete using Ground Granulated Blast Furnace Slag and Rice Husk Ash: Strength and Permeability Properties

Ankur Mehta, Rafat Siddique

PII: S0959-6526(18)32674-X
DOI: 10.1016/j.jclepro.2018.08.313
Reference: JCLP 14097
To appear in: *Journal of Cleaner Production*
Received Date: 18 March 2018
Accepted Date: 29 August 2018

Please cite this article as: Ankur Mehta, Rafat Siddique, Sustainable Geopolymer Concrete using Ground Granulated Blast Furnace Slag and Rice Husk Ash: Strength and Permeability Properties, *Journal of Cleaner Production* (2018), doi: 10.1016/j.jclepro.2018.08.313

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
