Numerical simulation of foam-based hydraulic fracturing to optimise perforation spacing and to investigate effect of dip angle on hydraulic fracturing

W.A.M. Wanniarachchi, P.G. Ranjith, J.C. Li, M.S.A. Perera

PII: S0920-4105(18)30787-3

DOI: [10.1016/j.petrol.2018.09.032](https://doi.org/10.1016/j.petrol.2018.09.032)

Reference: PETROL 5295

To appear in: *Journal of Petroleum Science and Engineering*

Received Date: 30 April 2018

Revised Date: 2 August 2018

Accepted Date: 10 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
