This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Regulation of Bile Secretion by Calcium Signaling in Health and Disease

David C. Trampert and Michael H. Nathanson

Department:

Section of Digestive Diseases, Department of Internal Medicine, Yale University School of Medicine, 333 Cedar Street, New Haven, CT 06520-8019, USA

Key words:

Calcium; inositol 1,4,5-trisphosphate receptor; hepatocyte; cholangiocyte; bile secretion; cholestasis

Address for correspondence:

Michael H. Nathanson

Section of Digestive Diseases,

Department of Internal Medicine,

Yale University School of Medicine
