Title: Nonlinear relationship between ER Ca²⁺ depletion versus induction of the unfolded protein response, autophagy inhibition, and cell death

Authors: Paula Szalai, Jan B. Parys, Geert Bultynck, Søren Brøgger Christensen, Poul Nissen, Jesper V. Møller, Nikolai Engedal

PII: S0143-4160(18)30065-4
DOI: <https://doi.org/10.1016/j.ceca.2018.09.005>
Reference: YCECA 1979

To appear in: *Cell Calcium*

Received date: 11-4-2018
Revised date: 25-8-2018
Accepted date: 13-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nonlinear relationship between ER Ca²⁺ depletion versus induction of the unfolded protein response, autophagy inhibition, and cell death
