Title: Verification of organophosphorus pesticide poisoning: Detection of phosphorylated tyrosines and a cysteine-proline disulfide-adduct from human serum albumin after intoxication with dimethoate/omethoate

Authors: Andreas Kranawetvogl, Markus Siegert, Florian Eyer, Horst Thiermann, Harald John

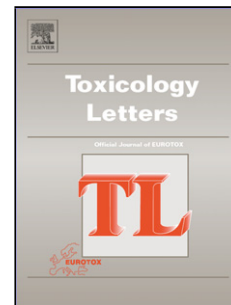

PII: S0378-4274(18)31762-4
DOI: <https://doi.org/10.1016/j.toxlet.2018.08.013>
Reference: TOXLET 10301

To appear in: *Toxicology Letters*

Received date: 4-6-2018
Revised date: 15-8-2018
Accepted date: 20-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Verification of organophosphorus pesticide poisoning:
Detection of phosphorylated tyrosines and a cysteine-proline disulfide-
adduct from human serum albumin after intoxication with
dimethoate/omethoate**
