E-mail address: lucy.fairclough@nottingham.ac.uk (L.C. Fairclough)

Running title: **Tobacco suppression of DC signalome**

Graphical Abstract

Alkhattabi et al. – Highlights

- Cigarette smoke/nicotine affect signalling molecules (SM) in human dendritic cells
- Suppress SM associated with dendritic cell (DC) maturation and T cell stimulation
- Suppress SM associated with DC survival and migration
- Overall, suppress DC immunogenicity at the SM level as shown protein microarray
