Role of genetic heart disease in sentinel sudden cardiac arrest survivors across the age spectrum

John R. Giudicessi, Michael J. Ackerman

PII: S0167-5273(18)31570-5
DOI: [doi:10.1016/j.ijcard.2018.05.100](https://doi.org/10.1016/j.ijcard.2018.05.100)
Reference: IJCA 26513

To appear in:

Received date: 7 March 2018
Revised date: 8 May 2018
Accepted date: 25 May 2018

Please cite this article as: John R. Giudicessi, Michael J. Ackerman , Role of genetic heart disease in sentinel sudden cardiac arrest survivors across the age spectrum. *Ijca* (2017), doi:[10.1016/j.ijcard.2018.05.100](https://doi.org/10.1016/j.ijcard.2018.05.100)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Role of Genetic Heart Disease in Sentinel Sudden Cardiac Arrest Survivors across the Age Spectrum

Running Title: Giudicessi and Ackerman – GHDs in SCA Survivors across the Age Spectrum

Authors: John R. Giudicessi, MD, PhD¹ and Michael J. Ackerman, MD, PhD²

Institutional affiliations: ¹Departments of Cardiovascular Medicine and Internal Medicine (Clinician-Investigator Training Program), Mayo Clinic, Rochester, MN. ²Departments of Cardiovascular Medicine (Division of Heart Rhythm Services), Pediatric and Adolescent Medicine (Division of Pediatric Cardiology), and Molecular Pharmacology & Experimental Therapeutics (Windland Smith Rice Sudden Death Genomics Laboratory), Mayo Clinic, Rochester, MN.

*Both authors take responsibility for all aspects of the reliability and freedom from bias of the data presented and their discussed interpretation.

Reprints and correspondence:

Michael J. Ackerman, M.D., Ph.D.

Mayo Clinic Long QT Syndrome/Genetic Heart Rhythm Clinic and the Windland Smith Rice Sudden Death Genomics Laboratory

Guggenheim 501, Mayo Clinic, Rochester, MN 55905

507-284-0101 (phone), 507-284-3757 (fax), ackerman.michael@mayo.edu

Funding Sources: This work was supported by the Mayo Clinic Windland Smith Rice Sudden Comprehensive Sudden Cardiac Death Program (to Dr. Ackerman). Dr. Giudicessi thanks the Mayo Clinic Cardiovascular Diseases Fellowship and Clinician Investigator Training Programs for fostering an outstanding environment for physician-scientist training.
