This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Low voltage areas in paroxysmal atrial fibrillation: The prevalence, risk factors and impact on the effectiveness of catheter ablation

Short title: LVA in paroxysmal atrial fibrillation

Authors: Xin-hua Wang M.D.¹, Zheng Li M.D.¹, Jia-liang Mao M.D.¹, Min-hua Zang M.D.¹, Jun Pu M.D.¹.

1- Department of Cardiology, Ren Ji Hospital, School of Medicine, Shanghai Jiao Tong University. These authors take responsibility for all aspects of the reliability and freedom from bias of the data presented and their discussed interpretation.

Drs Wang and Li contributed equally to this manuscript.
