This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: RCP still remains a valuable adjunct for HCA

Yuichi Ueda, M.D., Ph.D.

Department of Cardiovascular Surgery, Nara Prefecture General Medical Center, Nara,

Japan

Disclosures:

Author has nothing to disclose with regard to commercial support.

Address for reprints:

Yuichi Ueda M.D., Ph.D., Nara Prefectural Hospital Organization, 2-897-5 Shichijo-nishi,
Nara 630-8581, Japan (E-mail: y-ueda@nara-hp.jp).

Central Message

RCP has the beneficial effect of eliminating air and debris in the arterial circulation of the brain and should be used as an adjunct even in a short period of HCA.

Central Picture

Continuous Retrograde Cerebral Perfusion Circuit
