This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Functional MRS with J-edited lactate in human motor cortex at 4 Tesla

Keywords: aerobic glycolysis | energy metabolism | functional MRS | lactate | β -hydroxybutyrate | glutamate-glutamine cycling | neuroimaging | oxidative phosphorylation | finger tapping | motor cortex

Running Title: J-edited lactate change in human motor cortex

Highlights: fMRS feasibility with long echo-time J-edited ¹H-MRS of lactate
lactate increase in the human motor cortex with finger-tapping
fMRS feasibility in the human motor cortex at 4 Tesla
