Comparing the potential of MEG and EEG to uncover brain tracking of speech temporal envelope

Florian Destoky, Morgane Philippe, Julie Bertels, Marie Verhasselt, Nicolas Coquelet, Marc Vander Ghinst, Vincent Wens, Xavier De Tiège, Mathieu Bourguignon

PII: S1053-8119(18)30779-1

DOI: [10.1016/j.neuroimage.2018.09.006](https://doi.org/10.1016/j.neuroimage.2018.09.006)

Reference: YNIMG 15242

To appear in: *NeuroImage*

Received Date: 18 April 2018

Revised Date: 22 August 2018

Accepted Date: 3 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparing the potential of MEG and EEG to uncover brain tracking of speech temporal envelope
