This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mechanisms of allergen-specific immunotherapy: diverse mechanisms of immune tolerance to allergens

Anna Głobińska, Ph.D.,¹ Tadech Boonpiyathad, MD, PhD¹, Pattraporn Satitsuksanoa, PhD¹, Mirelle Kleuskens, Bsc^{1,2}, Willem van de Veen, PhD¹, Milena Sokołowska, MD, PhD¹, Mübeccel Akdis, MD, PhD¹

Mübeccel Akdis, MD, PhD, Swiss Institute of Allergy and Asthma Research (SIAF), Obere Strasse 22, CH-7270 Davos, Switzerland. Tel: +41-81-4100848; Fax: +41-81-4100840 akdism@siaf.uzh.ch

Conflicts of Interest

AG, TB, PS, MK, WV, MS and MA declare they have no competing interests.

Funding

The authors' laboratories are supported by Swiss National Science Foundation Grant No. 310030-179428, Sean Parker Asthma and Allergy Center, Stanford University USA.

Key messages

- Allergen-specific immunotherapy (AIT) is an immune tolerance-inducing treatment, effective in reducing symptoms of allergic rhinitis and asthma as well as venom-allergy and food allergy.
