This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of Cell-free DNA to Assess Risk of Tumoremia Following Endoscopic Ultrasound Fine-needle Aspiration of Pancreatic Adenocarcinomas

Short Title: Molecular Assessment of FNA-Induced Tumoremia

Authors: Michael J. Levy, MD¹
Benjamin R. Kipp PhD²
Dragana Milosevic, MS²
Amber R. Schneider, CT²
Jesse S. Voss, CT²
Rajeswari Avula, MS²
Sarah E. Kerr, MD²
Michael R. Henry, MD²
Edward Highsmith, Jr. Ph.D.²
Minetta C. Liu, MD^{2,3}
Ferga C. Gleeson, MD¹
