Prolonged Time to Diagnosis of Eosinophilic Esophagitis Despite Increasing Knowledge of the Disease

Craig C. Reed, MD, Nathaniel T. Koutlas, BA, Benjamin S. Robey, MD, Jason Hansen, BA, Evan S. Dellon, MD MPH

PII: S1542-3565(18)30096-X
DOI: [10.1016/j.cgh.2018.01.028](https://doi.org/10.1016/j.cgh.2018.01.028)
Reference: YJCGH 55664

To appear in: *Clinical Gastroenterology and Hepatology*
Accepted Date: 16 January 2018

Please cite this article as: Reed CC, Koutlas NT, Robey BS, Hansen J, Dellon ES, Prolonged Time to Diagnosis of Eosinophilic Esophagitis Despite Increasing Knowledge of the Disease, *Clinical Gastroenterology and Hepatology* (2018), doi: 10.1016/j.cgh.2018.01.028.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Prolonged Time to Diagnosis of Eosinophilic Esophagitis Despite Increasing Knowledge of the Disease

Craig C. Reed MD, Nathaniel T. Koutlas BA, Benjamin S. Robey MD, Jason Hansen BA,
and Evan S. Dellon MD MPH

Center for Esophageal Diseases and Swallowing, and Center for Gastrointestinal
Biology and Disease, Division of Gastroenterology and Hepatology, Department of
Medicine, University of North Carolina School of Medicine, Chapel Hill, NC

Short title: Symptom length in EoE

Financial support: This research was funded by NIH Awards T32 DK007634 (CCR), K23 DK090073 (ESD), and R01 DK101856 (ESD).

Abbreviations: eosinophilic esophagitis (EoE); University of North Carolina (UNC)

Potential competing interests: None of the authors report and potential conflicts of interest with this study. Dr. Dellon is a consultant for Adare, Alivio, Banner, Enumeral, Receptos/Celegene, Regeneron, and Shire, receives research funding from Adare, Meritage, Miraca, Nutricia, Receptos/Celgene, Regeneron, and Shire, and has received an educational grant from Banner.

Keywords: dysphagia; corticosteroids; symptom response

Writing assistance: No writing assistance was utilized in the preparation of the manuscript.

Current word count: 750

Specific author contributions (all authors approved the final version):

Reed: Manuscript drafting; data analysis/interpretation; critical revision

Koutlas: Data extraction; critical revision

Robey: Data extraction; critical revision

Hansen: Data extraction; critical revision

Dellon: Project conception; supervision; data analysis/interpretation; manuscript drafting; critical revision.
