This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This empirical study was conducted to understand residents' acceptance of the EBM databases
- The residents' level of awareness and use of EBM databases is at the moderate level
- The UTAUT a powerful explanation of the physicians' acceptance toward EBM databases
- The performance expectancy factor is important factor in the acceptance of EBM databases
- The Social influence factor, has the least impact on the acceptance of EBM databases
