This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Chances and limitations of a low-priced mobile 3-D scanner for breast imaging in comparison to an established 3-D photogrammetric system

Authors

Konstantin C. Koban (Koban KC)^{1*}, MD

Felix Härtnagl (Härtnagl F)^{1*}, MD

Virginia Titze (Titze V)¹, MD

Thilo L. Schenck (Schenck TL)¹, MD, PhD

Riccardo E. Giunta (Giunta RE)¹, MD, PhD

¹: Division of Hand, Plastic and Aesthetic Surgery, University Hospital, LMU Munich

*: Both authors contributed equally to this work
