Inhibition of virulent and hypovirulent *Cryphonectria parasitica* growth in dual culture by fungi commonly isolated from chestnut blight cankers

Matthew Kolp, Dennis W. Fulbright, Andrew M. Jarosz

PII: S1878-6146(18)30107-7

DOI: [10.1016/j.funbio.2018.05.007](https://doi.org/10.1016/j.funbio.2018.05.007)

Reference: FUNBIO 934

To appear in: *Fungal Biology*

Received Date: 21 February 2018

Revised Date: 16 May 2018

Accepted Date: 29 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Inhibition of virulent and hypovirulent *Cryphonectria parasitica* growth**  
2 **in dual culture by fungi commonly isolated from chestnut blight cankers**
