Mathematical Modeling of the Proliferation Gradient in MultiCellular Tumor Spheroids

T. Michel, J. Fehrenbach, V. Lobjois, J. Laurent, A. Gomes, T. Colin, C. Poignard

PII: S0022-5193(18)30410-7
DOI: https://doi.org/10.1016/j.jtbi.2018.08.031
Reference: YJTBI 9596

To appear in: *Journal of Theoretical Biology*

Received date: 23 January 2018
Revised date: 29 June 2018
Accepted date: 19 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Proliferation gradient in tumor spheroids can be modeled by continuous spatial model
- Model calibration method derived from model simplification
- Method for comparison between 2D slice images and 3D continuous simulations
- Spatial data improve the prediction on tumor radius during the quiescent phase
