

## Accepted Manuscript

Pelagic key species and mechanisms driving energy flows in the northern Benguela upwelling ecosystem and their feedback into biogeochemical cycles

Werner Ekau, Holger Auel, Wilhelm Hagen, Rolf Koppelman, Norbert Wasmund, Karolina Bohata, Fritz Buchholz, Simon Geist, Bettina Martin, Anna Schukat, Hans M. Verheye, Thorsten Werner

PII: S0924-7963(17)30013-1  
DOI: doi:[10.1016/j.jmarsys.2018.03.001](https://doi.org/10.1016/j.jmarsys.2018.03.001)  
Reference: MARSYS 3060  
To appear in: *Journal of Marine Systems*  
Received date: 6 January 2017  
Revised date: 1 March 2018  
Accepted date: 13 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
