The effects of low seawater pH on energy storage and heat shock protein 70 expression in a bivalve *Limecola balthica*

Adam Sokołowski, Dominika Brulińska

PII: S0141-1136(18)30243-5

DOI: [10.1016/j.marenvres.2018.06.018](https://doi.org/10.1016/j.marenvres.2018.06.018)

Reference: MERE 4554

To appear in: *Marine Environmental Research*

Received Date: 23 March 2018

Revised Date: 26 June 2018

Accepted Date: 27 June 2018

Please cite this article as: Sokołowski, A., Brulińska, D., The effects of low seawater pH on energy storage and heat shock protein 70 expression in a bivalve *Limecola balthica*, *Marine Environmental Research* (2018), doi: 10.1016/j.marenvres.2018.06.018.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
