Osteogenesis by foamed and 3D-printed nanostructured calcium phosphate scaffolds: effect of pore architecture

Albert Barba, Yassine Maazouz, Anna Diez-Escudero, Katrin Rappe, Montserrat Espanol, Edgar B. Montufar, Caroline Öhman-Mägi, Cecilia Persson, Pedro Fontecha, Maria-Cristina Manzanares, Jordi Franch, Maria-Pau Ginebra

PII: S1742-7061(18)30520-8  
DOI: <https://doi.org/10.1016/j.actbio.2018.09.003>  
Reference: ACTBIO 5647

To appear in: *Acta Biomaterialia*

Received Date: 1 June 2018  
Revised Date: 31 July 2018  
Accepted Date: 5 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
