This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

<sup>4</sup> Department of Neurosurgery, Medical University of Innsbruck, Austria

† These two authors equally contributed to the present study.

*Acknowledgments*

The authors express their gratitude to AOSpine North America for their support with fellowship funding for Yu Moriguchi, and to the AANS/CNS spine section with research funding. The authors thank Stephen Doty, PhD, and Orla O'Shea for the work on the histology. They also thank Sara Towne for her tremendous help with writing and reviewing the animal protocol.
