Title: Challenges for growth of beech and co-occurring conifers in a changing climate context

Authors: Edurne Martinez del Castillo, Peter Prislan, Jožica Gričar, Vladimir Gryc, Maks Merela, Kyriaki Giagli, Martin de Luis, Hanuš Vavrčik, Katarina Čufar

PII: S1125-7865(18)30057-2
DOI: <https://doi.org/10.1016/j.dendro.2018.09.001>
Reference: DENDRO 25536

To appear in:

Received date: 28-3-2018
Revised date: 28-8-2018
Accepted date: 2-9-2018

Highlights

- Different climatic factors regulate growth of different species on the same site
- Climate-growth relationships vary within the same species on different sites
- Beech plasticity is limited by the short duration of its growth
- Conifers can prolong their growth period and adapt to drought-prone environments
