SnS nanoparticles anchored on Ti_3C_2 nanosheets matrix via electrostatic attraction method as novel anode for lithium ion batteries

Jinjin Ai, Yike Lei, Shuai Yang, Chunyan Lai, Qunjie Xu

PII: S1385-8947(18)31826-6
DOI: <https://doi.org/10.1016/j.cej.2018.09.109>
Reference: CEJ 19948

To appear in: *Chemical Engineering Journal*

Received Date: 23 July 2018
Revised Date: 9 September 2018
Accepted Date: 14 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**SnS nanoparticles anchored on Ti₃C₂ nanosheets matrix via
electrostatic attraction method as novel anode for lithium ion
batteries**
