Predictions of water/oil interfacial tension at elevated temperatures and pressures: A molecular dynamics simulation study with biomolecular force fields

Konstantinos D. Papavasileiou, Othonas A. Moulτος, Ioannis G. Economou

PII: S0378-3812(17)30182-6

DOI: [10.1016/j.fluid.2017.05.004](https://doi.org/10.1016/j.fluid.2017.05.004)

Reference: FLUID 11475

To appear in: *Fluid Phase Equilibria*

Received Date: 6 April 2017

Revised Date: 29 April 2017

Accepted Date: 4 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
